SPENCER GOLDBERG - Full Stack Software Developer

Originally from Cleveland, Ohio. I am a software engineer with two years of experience developing mobile applications and one year working as a backend developer integrating new frameworks to keep up with the current evolving industry. I have 4+ years of experience learning the fundamentals of programming and writing algorithms to solve complex problems.

EDUCATION

Florida Atlantic University   Boca Raton, FL

Bachelor of Science, Major: Data Analytics

Related Coursework: Data Analytics/Statistics/Calculus/Math for Data Science/Java

Expected Graduation Date: Spring 2025

WORK EXPERIENCE

Cocobolo Group   Boca Raton, FL

Senior iOS Engineer

October 2021-Present

- Spearheading development of two unique iOS apps to pair restaurant guests and servers, utilizing SwiftUI, Xcode, and agile methodologies for timely delivery in Spring 2023.
- Attend daily engineering standups, report project progress, and provide solutions to technical challenges.
- Write maintainable code, distribute betas using Xcode Cloud for seamless testing and deployment, and integrate Google Places API to allow users to easily find nearby restaurants and workplaces.
- Develop cloud functions for the Business Dashboard website, adding new features and improving usability.
- Led development of an Apple Watch app companion for the iOS apps to enhance user experience on-the-go.
- Manage recruitment, review resumes of potential new hires, and ensure alignment with company goals.
